

Clients First Business Solutions Presents —

MAS 90/200 Fall User Group Meeting

Technology is forever changing the world in which we do business. It advances the way we sell and market our products and services, improves productivity and yields greater operational efficiencies. Yet most businesses only utilize 30% of their MAS 90/200 functionality because they never take the time to understand the full potential of their software.

The Clients First User Group is open to anyone who desires to learn and understand how to maximize their current software investment. Attendees will gain knowledge on ways to save time, lower costs, increase productivity, and better serve their customers.

We encourage and welcome your participation.
